

Crazy Eights

Prerequisites:

- Standard 52-card pack
- A brain (you can borrow one)

Rules:

- Deal 5 cards face down to each player at the beginning of the round. The cards remaining after giving the players their starting cards are to be used as stock.
- The starter card is the first card on top of the stock and begins the starter pile except if it is 8. If the starter card is 8 then place the card in the middle of stock and draw another starter card.
- Starting with the player to the left of the dealer the player must match the top card on the starter pile with the same rank or suit.
- If the player is unable to match the top card on the starter pile then they must draw from the stock until they've drawn 5 times or they can match the card on the starter pile.
- 8 is an exception because they are crazy and may be played at any time
- The round is over whenever any player runs out of cards to play, and at the end of the round points are tallied up
- The values of the cards are as follows
 - Each eight = 50 points
 - Each K, Q, J or 10 = 10 points
 - Each ace = 1 point
 - Each other card is the face value of the card
- After tallying up the points, shuffle the deck and replay until a player reaches 100 points. Once 100 points have been reached, whoever has the least points wins.
